

Interstate & I-5 Improvements

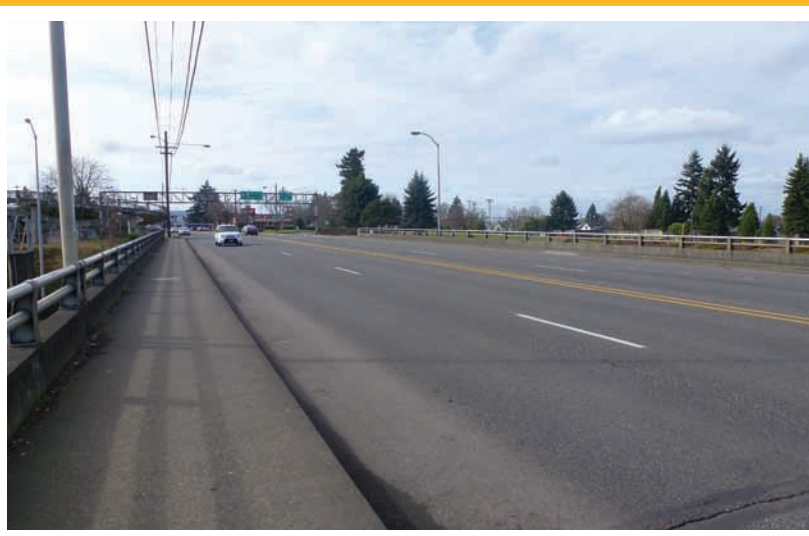

Activate the field at De La Salle, turning it into a public amenity and community gathering space while also keeping eyes on the transit center.

Improve the landscaping around gas stations to provide a needed buffer for pedestrians and transit riders.

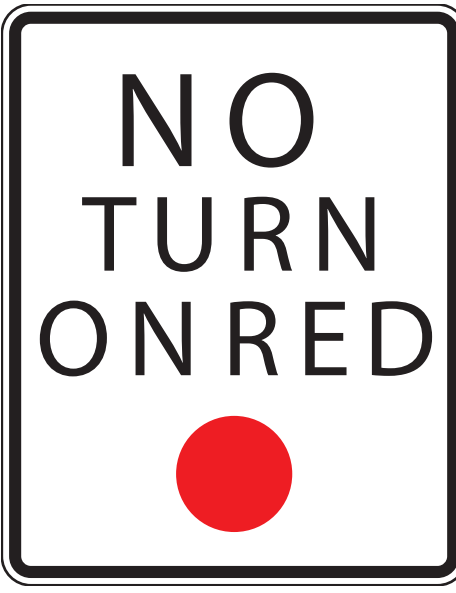

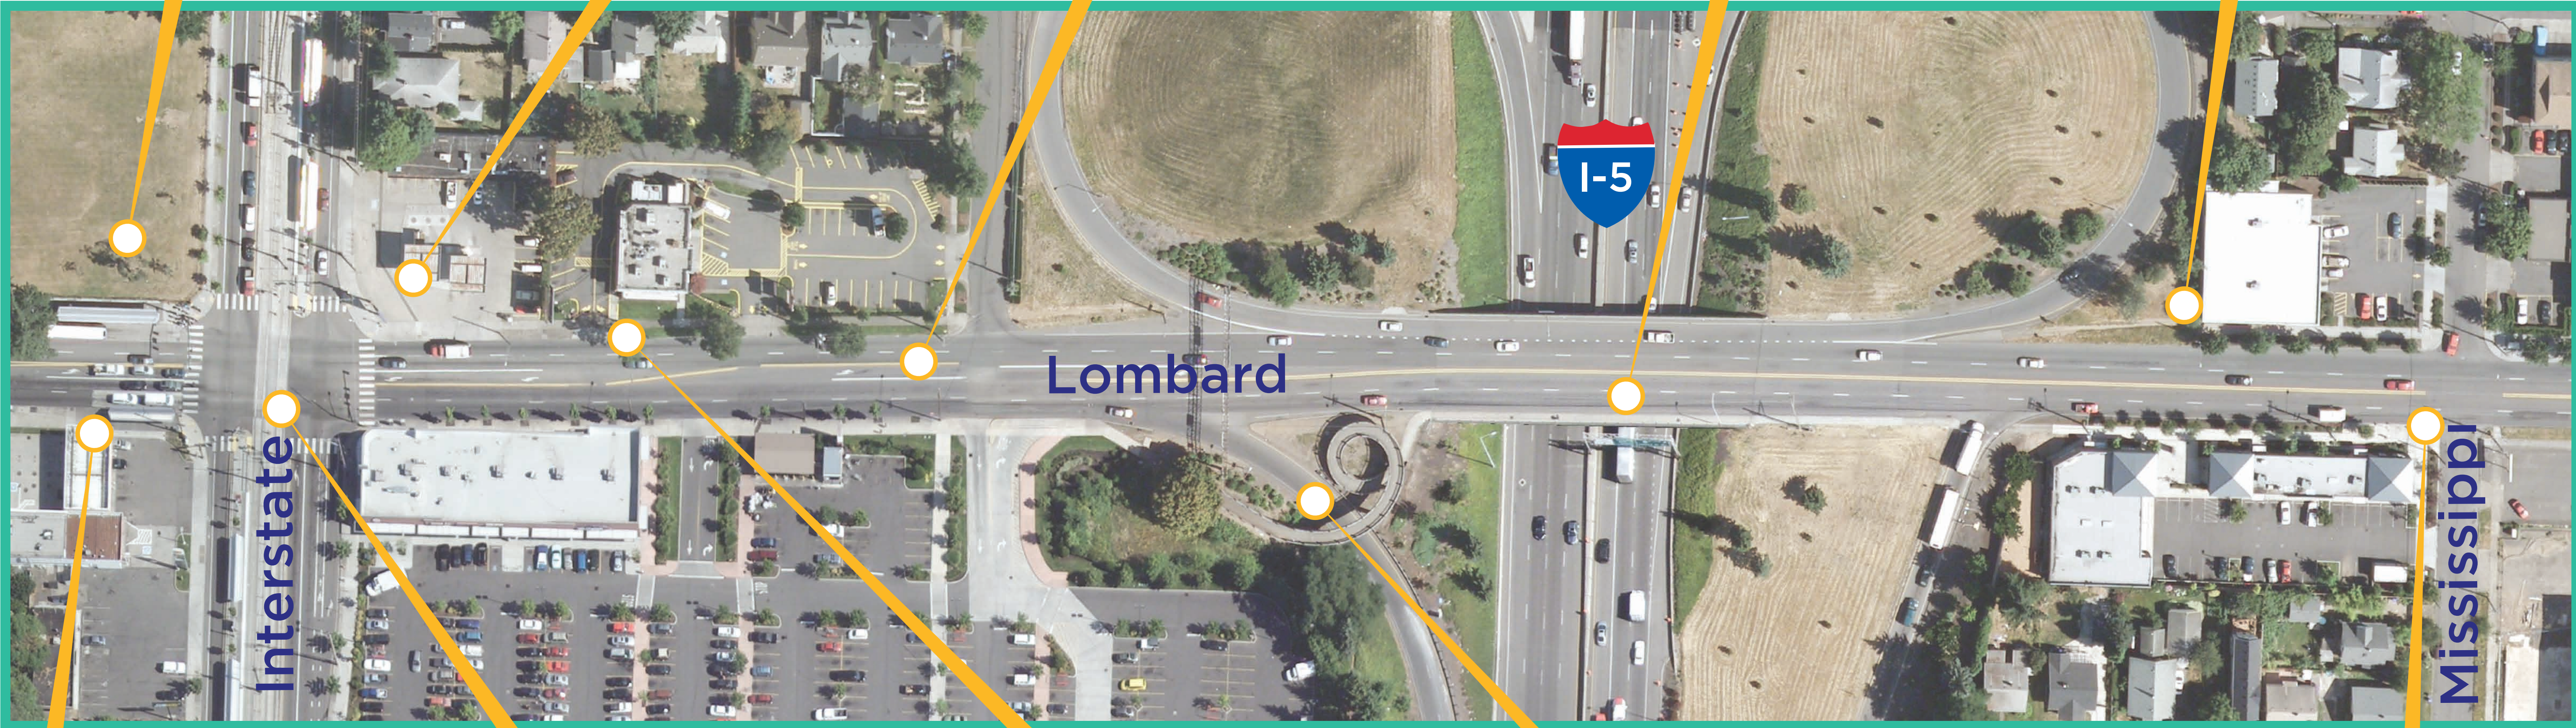

Add a new crossing at Montana to give pedestrians a safe way to access the I-5 crossing on the south side of Lombard.

Widen the sidewalk across I-5 to provide enough space for bicyclists and pedestrians to share the sidewalk comfortably.

Install a barrier and sign directing pedestrians to cross at Mississippi to discourage people from making an unsafe north-side crossing of I-5.

Convert the right lane to a bus and right turn only lane to improve transit speed and reliability. Prohibit right turns on red to increase pedestrian safety.

Make the intersection and transit center cleaner and safer through better garbage cans, regular cleaning, and security cameras.

Prohibit left turns from Wendy's parking lot onto Lombard to improve safety

Replace the ugly and ineffective pedestrian bridge over the I-5 ramp with rapid flash beacons and a crosswalk.

Add a new crossing at Mississippi to give pedestrians safe access to the I-5 crossing sidewalk and connect two high-ridership bus stops.
