

Trees & Greenery

Goal: Lombard will have a pleasant, attractive, and inviting streetscape that encourages pedestrian activity and contributes to a sense of place.

Strategy: Increase trees and greenery throughout the corridor.

Action: Complete tree planting along Lombard & adjacent side streets.

The City of Portland and Friends of Trees can work with neighborhoods to conduct tree plantings at reduced costs.

Action: Remove unnecessary pavement to create planting strip or add stand-up planters

Unnecessary pavement on the sidewalk can be depaved...

...and replaced with grass or plants.

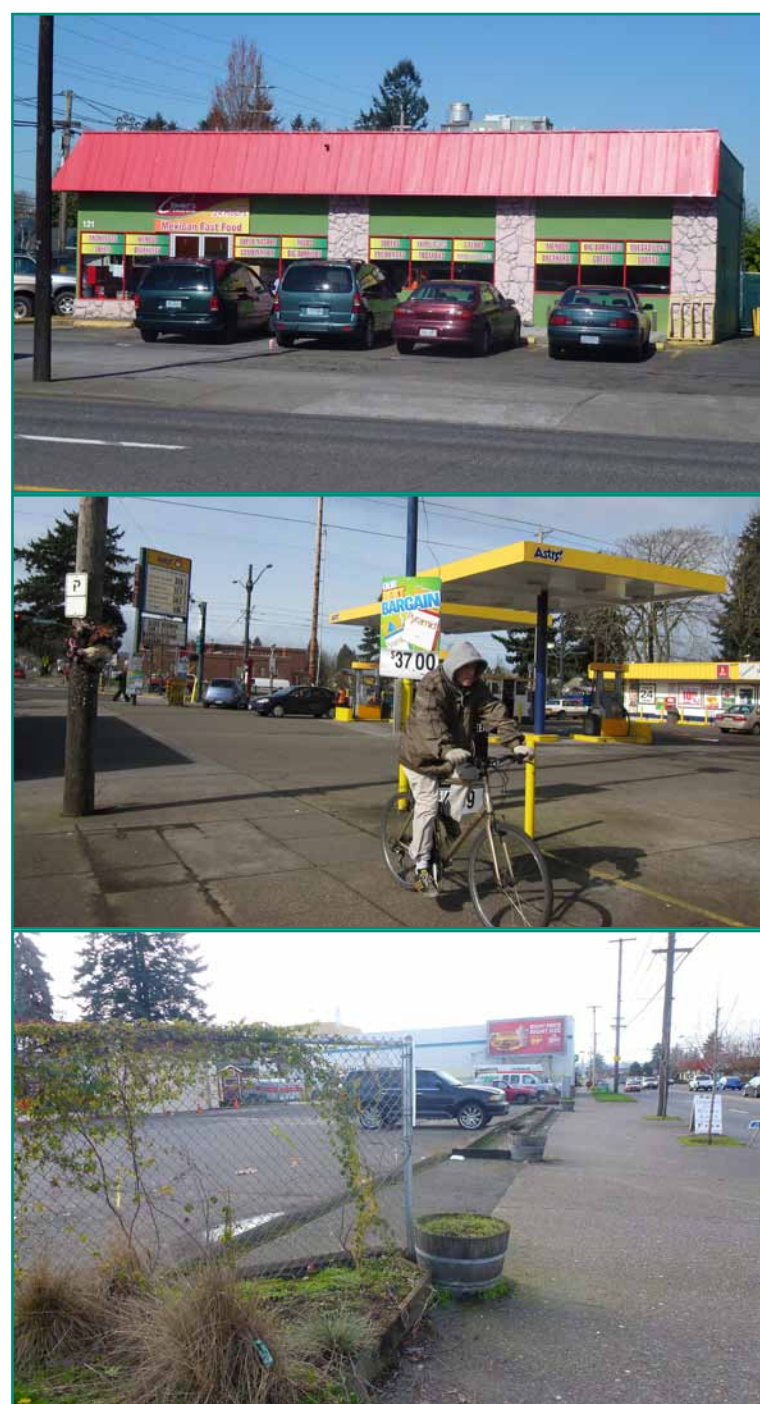

Groups of property owners can apply to have rain gardens installed by the City's Green Streets program.

Planters can come in a variety of shapes and styles. A consistent style along Lombard would create a distinctive look.

Action: Add landscaping between sidewalks and parking lots

Parking lots that are built up to the sidewalk create an unpleasant environment for people walking along the street.

Creative landscaping builds a more beautiful streetscape and separates pedestrians from parking.

Action: Use hanging planters in commercial areas

Hanging baskets are an attractive addition to the streetscape and can be attached to telephone poles, street signs, and lamp posts.
