

Streetscape Amenities

Goal: Lombard will have a pleasant, attractive, and inviting streetscape that encourages pedestrian activity and contributes to a sense of place.

Strategy: Showcase the history, character, and identity of Lombard and adjacent neighborhoods.

Mural Art

Blank walls today...

...could be canvases for local artists (like this mural in the Buckman neighborhood).

Neighborhood Flags

Flags along the corridor could display neighborhood names or themes.

Lighting

Historic light fixtures from the Mock's Crest neighborhood could serve as inspiration.

Gateways and Arches

Landscaped gateways help establish a sense of place. Archways, such as those in Laurelhurst, may work in small spaces where no extra right-of-way is available..

Strategy: Provide basic streetscape amenities for pedestrian comfort and convenience.

Bus Stop Amenities

Many bus stops along Lombard are inadequate and poorly maintained.

Shelters with seating, lighting, and trash cans provide a more comfortable place to wait.

Sidewalks

Many sidewalks are in poor condition and lack proper curb cuts.

Sidewalks should be accessible and in good repair.

Benches

Benches give people places to rest and can be community gathering spaces.

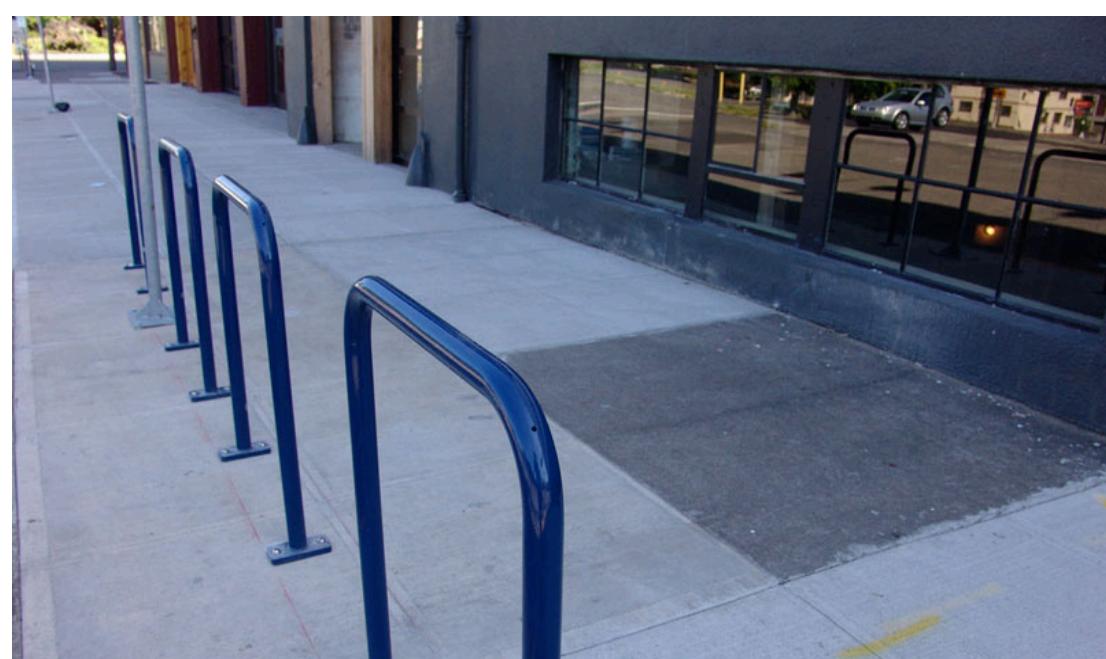

Trash Cans

More trash receptacles - and a plan to maintain them - are needed to combat litter and keep Lombard clean.

Bike Parking

Bike parking options can range from simple bike staples to covered shelters, like this one from the Transit Mall downtown.
